The PCS-J loudspeaker series is primarily designed for the Asian KTV market. The PCS-J series loudspeakers consist of two models: PCS-110J and PCS-112J in its portfolio. It utilizes a totally newly designed 100° x 40° KTV horn with optimized 1" waveguide, equipped with rich clear sound out to 20 KHz reproducing neodymium driver. The woofers maintain newly designed die-cast chassis and newly formulated paper cone. The specially formulated cone pulp allows this driver to give a warm and smooth response throughout the bass frequency range. The PCS-J Series is the ideal Karaoke loudspeaker system to provide transparent and natural treble, warm and smooth mid-frequency, and powerful bass for clear and elastic drum sounds. Totally nineteen M8 suspension points and a 35 mm pole socket offer a wide range of installation and hanging possibilities in vertically or horizontal orientation.
